

# TEST PROJECT IT SOFTWARE SOLUTIONS FOR BUSINESS

WSC2015\_TP09\_S8\_actual

Written by:

WorldSkills International External Writer

## CONTENTS

Session 8 of this Test Project consists of the following documentation/files:

1. WSC2015\_TP09\_S8\_EN.pdf (Session 8 instructions)
2. In addition, you will be using what you have developed over the last few days

## INTRODUCTION

Congratulations – you have almost reached the end of the tasks you have been set. You have developed the system required by Marathon Skills and all that remains is for you to present your system to the client.

## INSTRUCTIONS TO THE COMPETITOR

By the end of this session, you will need to have prepared a PowerPoint presentation that shows all aspects of your system to the client.

Your presentation should show all parts of the system. Use screenshots and make sure that the presentation indicates the flow from one part to another.

**Important** – perhaps not all parts of your system work perfectly. Do not worry about this, but just make sure that you still show how each part links to the next. If necessary just create a dummy window.

Make sure that you follow the provided style guide in your presentation (fonts and colours).

**Important** – you do not have to speak at all.

Imagine that you are trying to convince the client to choose your system. Make sure your presentation is professional and complete.
